# Map my career SNOWSPORT WINTER

## Welcome to your career in the Snowsport sector!

A ski resort is a well-oiled machine where each department has a critical part to play. When you join the team, you will start off in one of these departments. You may move between departments to find your niche, or charge ahead and work your way up to more senior roles.

Snowsport careers have strong links into the tourism sector. Quite a few snowsport professionals transition back and forth between ski area roles and summer tourism roles to create year-round careers. Others travel abroad to maintain a perpetual winter! Tourism employers are keen to see snowsport on your CV as it proves you have experience in a high volume, fast-paced setting, have great customer service skills, and can cope with weather extremes!

### Typical winter to summer transitions
